

CITY OF SAN ANTONIO
**EDWARDS AQUIFER
PROTECTION PROGRAM**

The Edwards Aquifer is San Antonio's primary source of water--more than 82% of drinking water used by SAWS customers comes from the Edwards Aquifer! The City of San Antonio's Edwards Aquifer Protection Program (EAPP) regulates activities that have the potential to pollute this precious resource. Come hear from EAPP staff about their career-journeys and what they do in their current roles!

Phillip Covington, *Program Manager*
Susan Courage, *Senior Management Analyst*
David Bernal, *Management Analyst*
